

Hirat Rahman Rahi

Bloomington, IL | hrahi@iwu.edu | hiratrahi.com | github.com/hiratinspace | linkedin.com/in/hiratrahi

EDUCATION

Illinois Wesleyan University, B.S. in Computer Science & Neuroscience

Dec 2027

Key Coursework: Algorithms, Data Structures, Software Development, Discrete Math

PROJECTS

Specter-AI, AI-Powered Penetration Testing Reconnaissance Platform

GitHub

Python, Flask, Anthropic Claude API, SSE, dnspython, Apache-2.0

- Built a modular recon engine running four security modules (DNS and WHOIS enumeration, port scanning, HTTP probing, SSL/TLS analysis) in parallel, then feeding aggregated findings to Claude for AI-driven risk assessment and structured Markdown reporting.
- Shipped a real-time Flask dashboard with server-sent-event scan progress, report views, and scan history; designed a CLI with quick and full scan modes plus an offline no-AI fallback.

TuitionCreep, 4-Year College Cost Modeling Web App

tuitioncreep.org

Next.js, data pipelines, federal IPEDS dataset, statistical modeling

- Designed and deployed a live product modeling true 4-year tuition cost across 3,525 US institutions using 15 years of federal IPEDS data, showing how compounding tuition erodes flat scholarships.
- Built school search, multi-school comparison, and aid modeling end to end with a documented methodology page; the site is publicly live, free to use with no sign-up required.

Hackathon Projects: Appeally, Glovebox, Crypto-Solver

GitHub

- Appeally** (JavaScript): built an automated insurance claiming app collaboratively in a hackathon team.
- Glovebox** (Swift): shipped an offline AI road assistant app from the UC Berkeley AI Hackathon.
- Crypto-Solver** (Python): automated solver for CTF cryptography challenges, used in competitive CTFs.

VENTURES

REDHEXX, Founder

redhexx.com • 2026 to Present

AI-native security review for MCP and autonomous-agent attack surface

- Founded an independent security venture reviewing the attack surface that MCP servers and AI agents add to production stacks: unauthenticated tools, over-broad scopes, and prompt-injection-to-tool-abuse chains.
- Built the methodology (enumerate tool schemas, model attack paths, prove exploit chains with replayable PoCs) and shipped the product site; onboarding early design partners.

PROFESSIONAL EXPERIENCE

Integrity Technology Solutions, IT Intern

Bloomington, IL

Managed IT services and cybersecurity

Aug 2026 - Present

- Rotational internship supporting security operations and IT service delivery for regulated clients in banking and healthcare at a NIST CSF-aligned managed security service provider.

McLean County Government, Intern Analyst, Regional Planning Commission

Bloomington, IL

Data engineering and analytics

Aug 2025 - Aug 2026

- Analyzed 5+ years of transportation and US Census data to identify demographic and mobility trends supporting the 2055 Metropolitan Transportation Plan.
- Built automated data pipelines and interactive Tableau dashboards to improve reporting efficiency and data-driven planning decisions; develop supporting websites for planning projects.

Driving Forward, Intern Analyst & Team Lead

(remote) Chicago, IL

Cybersecurity and AI readiness consulting (Mentored by a senior manager at Deloitte)

Dec 2025 - Mar 2026

- Led a 4-member team benchmarking midsize companies' cybersecurity and AI readiness across 10 control domains against NIST CSF and ISO 27001, producing maturity scores on a 1 to 5 scale.
- Evaluated cloud, network, and data-security controls via framework research and leadership interviews; delivered executive reports and roadmaps targeting gaps in DLP, vendor risk, and AI governance.

LEADERSHIP EXPERIENCE

Senior Resident Advisor, IWU Residential Life: mentor 58+ students across halls serving 350+ residents.

President, ACM Chapter at IWU: Host workshops, participate in Hackathons nationwide with 50+ members.

Founder & President, Billiards Club: lead 7+ board members running 10+ events for 200+ participants.

Presidential Ambassador, IWU Admissions: Led panel sessions each fall for 500+ prospective students and family members.

SKILLS

Languages: Python, Java, C++, SQL, HTML, CSS, JavaScript

Frameworks & Tools: Flask, Next.js, REST APIs, Git, Linux, Anthropic Claude API, automated data pipelines

Cybersecurity: Penetration testing, reconnaissance, binary and web exploitation, CTF competitions, MCP and AI-agent security, NIST CSF, ISO 27001, DLP controls, DNS, SSL/TLS analysis

Data & Cloud: Tableau, large public datasets (IPEDS, US Census), database management

Spoken: English, Bengali, Sylheti, Hindi
